

HOW DO RABBITS PLAY?

ENRICHMENT TIPS

- It's important to provide your rabbit with toys so they get plenty of mental stimulation.
- Rabbits like toys they can dig, throw, and chew, which encourages them to express their natural instincts.
- Food-dispensing toys make rabbits work for their food!
- Use treats to teach your rabbit simple tricks, like turning in a circle or jumping over hurdles. Some rabbits can even nose boop on command!
- Rabbits are prey animals, and often like to spend time in hiding spaces like a play house or cardboard box.

Pro tip: Use play to encourage your rabbit to perform natural bunny behaviors. You can make fun, simple toys at home using items you already have, like a toilet paper roll stuffed with hay and a secret treat hidden inside.
